SERIES 4 & SERIES 5
CENTER ISLAND CABINET
Instructions For Use
OVERVIEW

- Access Panel / Electrical Chase
- GFCI Electrical Duplex Outlets (2) (Series 5 only)
- Optional X-Ray / Storage Module
- Optional Cabinet Mount Light
- Glove Dispenser / Cup and Towel Dispenser
- Backsplash (varies by model)
- Solid Surface Countertop (varies by model)
- Faucet Foot Control
- Stainless Steel Sink
- Metal Sub Base
- Faucet and Soap Dispenser
- Trash Drop
- Access Panel / Electrical Chase
INTRODUCTION

SYMBOLS
The following symbols may be used throughout this product manual:

CAUTION: General Caution. Failure to carefully follow the described procedure may result in damage to the equipment.

WARNING: Failure to carefully follow the described procedure may result in damage to the equipment, the operatory, and/or the operator.

ELECTRICAL HAZARD: Risk of electrical shock present. Ensure that power is disconnected before attempting this procedure.

NOTE: Take note of additional important information. Not a warning or caution.

Manufacturer

Manufacturing date

Waste Electrical and Electronic Equipment

Type B Equipment (Protected against electrical shock)

Protective Earth (ground)

Alternating Current

Conforms to applicable European Directives (Essential Requirements)

Electrical Testing Lab

Advisable to consult accompanying documents

Refer to instruction manual/booklet

GENERAL INFORMATION

INTENDED APPLICATION AND USE

The DCI Edge Center Island Cabinet provides storage, work surfaces, and support for dental operatory lights, x-rays, and accessory devices.

PRODUCT IDENTIFICATION

This product can be identified by the label on the left-most interior panel. This label states the model number, serial number, electrical specifications, manufacturing date, and safety classifications.

ENVIRONMENTAL CONDITIONS

Operating Conditions:
- Temperature: 67-76° F
- Humidity: 20-60%
- Altitude: <5,000 m

Shipping conditions:
- Temperature: -68 - 122° F
- Humidity: 10-90%

ELECTRICAL OUTLETS

115VAC 20A 60 Hz

INCOMPATIBLE DEVICES

For safety reasons, only DCI original devices and accessories approved for this product, or accessories from third parties released by DCI may be used.

PRODUCT DISPOSAL

Contact your local, authorized dealer for disposal of this device to ensure compliance with your local environmental regulations.

TECHNICAL DOCUMENTATION

The manufacturer will make available upon request circuit diagrams, component part lists, descriptions, and calibration instructions to technical personnel responsible for the installation and service of this equipment.

PREVENTATIVE INSPECTION

The performance of the equipment can be affected by use over time. Periodically inspect the water and air lines for visible cracks or cuts, and inspect for loose fittings and fasteners which could lead to leaks or other poor performance characteristics. Inspect joints and tensioning screws as a regular maintenance item to ensure proper positioning of the device.
GENERAL SAFETY

IMPORTANT SAFETY INSTRUCTIONS

WARNING: This product must be disinfected before use.

CAUTION: Only authorized service technicians should attempt to service this equipment. Use of other than authorized technicians will void the warranty.

CAUTION: Product must be bolted to the floor before use.

WARNING: To avoid risk of electric shock, this equipment must be connected only to supply mains with protective earth.

WARNING: Modification of this equipment is not allowed.

WARNING: Failure to disinfect this device between patients could expose the user and patient to cross contamination and bioburden/biocontamination.

WARNING: Do not allow children unsupervised access to this cabinet and auxiliary equipment.

WARNING: Use this cabinet only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

WARNING: Do not use outdoors.

WARNING: Do not plug in ancillary equipment to the external electrical outlets of this cabinet which require a current draw greater than 3 amps.

SAVE THESE INSTRUCTIONS
DISINFECTION AND CLEANING

BARRIER TECHNIQUE
Wherever possible, use disposable barriers and change them between patients. The barrier technique will ensure maximum long-term durability of the surfaces and finishes of the equipment.

DISINFECTION & STERILIZATION
The Manufacturer will not attempt to specify the required intervals for disinfection nor can it recommend the overall best surface disinfectant. Please refer to the Infection Control Recommendations published by the American Dental Association for further information. The use of chemical disinfecting agents is not necessary if the instrument is going to be sterilized. While their use may be easy and quick, it is important to know the effectiveness of any chemical disinfectant against the various agents of infection that may be encountered.

CHEMICAL DISINFECTION
Follow the instructions below carefully to ensure the longest life for your equipment:

1. Only use the acceptable disinfectants listed. Use of unacceptable products will void your warranty.
2. Thoroughly wash all areas that have been exposed to disinfectant cleaners with mild soap and warm water at least once per day. This wash down will minimize the harmful effects of chemical disinfectant residues being allowed to accumulate on the equipment.
3. When using chemical disinfectants, always pay strict attention to the manufacturer’s disinfectant directions.
4. When using concentrated disinfectants, measure the concentrate carefully and mix according to package directions.
5. Disinfectant solutions that are relatively harmless to surfaces at their recommended strengths can be corrosive at higher than recommended dilution ratios.

GENERAL CLEANING
Equipment can be cleaned with a solution of mild detergent and warm water. A variety of surface disinfectants are available for use in dental treatment rooms. Some of these can cause discoloration of painted, plated or anodized surfaces with repeated use. This can be minimized by careful adherence to the disinfectant manufacturer’s instructions and by frequent washing with soap and water.

CAUTION: Do not use powdered cleansers, scouring pads or abrasive scrubbers on any of the painted, plastic or metal surfaces of this dental unit. To remove dried-on material, use a soft-bristled brush and a solution of mild detergent.
